## Corrosion Inhibitor - Laser systems

Part/Order no:	Packing
RXSOL-40-4024-25	25 Ltrs
RXSOL-40-4024-210	210 Ltrs

### Product Description:

Laser systems - corrosion inhibitor for cooled water system.

RXSOL-40-4024 is a high performance corrosion inhibitor developed specifically for water cooled laser systems and hot water heating systems. RXSOL-40-4024 prevents metal corrosion and oxygen consumption in the cooling system water. It is also very safe to use. Many water cooled lasers and modern energy saving heating systems often contain little water, up-to-date measuring and monitoring devices

E.g.heat and flow meters, temperature sensors and thermostatic control valves.Such systems are often more sensitive to rust sludge than conventional systems.Because of these technical developments, corrosion prevention should be a priority in every new installation.

RXSOL-40-4024 is used at a concentration of 1-2% system water, i.e. 1-2 Kg per 100 litres of system volume.

Dosing should be carried out at a point in the system where thorough mixing is possible using a bypass or a pump.

## Enjoy our Warehouse Services

We are engaged in rendering Warehouse Services to the clients, so that they can safely store their goods. Our services are availed by renowned manufacturers, traders and suppliers from different parts of the country. Moreover, our warehouse is free from pests and rodents as we take various pest cleaning measures. Our Warehouse Services are offered to the clients at cost effective rates.

### FEATURES:

1. Builtup with International norms
2. Safety with CCTV, Security Guard
3. Full amenities
4. Free from pests and rodents
5. Large space available
6. Available in all major port locations
