Gamabreak

Part/Order no:

Packing

RXSOL-16-1026-25

25 Ltrs

RXSOL-16-1026-210

210 Ltrs

Product Description:

Gamabreak rapidly breaks water-in-oil emulsions in all grades of fuel. It assists water removal in the settling tank and fuel centrifuges.

Product Properties:

Gamabreak breaks water-in-oil emulsions by lowering the surface tension between the two phases. It is insoluble in water and remains effective even after the water has been removed. Powerful dispersants combat existing sludge formations while homogenizing the fuel to prevent new sludge from being formed. Centrifugal separation of catalyst fines is improved, reducing abrasion damage. The homogenizing action of Gamabreak keeps heavy fuel particles in suspension, therefore fuel filters block less frequently, tanks and lines remain cleaner, and in general, fuel systems maintenance is minimized. Consequently, a greater proportion of supplied fuel is available for combustion.

Directions for Use and Dose Rates:

Dose into the bunker tank prior to, or during bunkering. Allow the product to mix well with the fuel. If fuel analysis is available, the dosage should be based on the water content, as per the following table.

Product Description:

APPEARANCE:	yellow liquid
DENSITY in g/cm ³ at 15°C:	0.9
FLASH POINT (PMCC) °C:	Above 61
COMPATIBILITY:	-----
Metal:	No known effect
Rubber:	May swell
Synthetic rubber:	Rubber May swell

Features, Benefits and Applications:

1. Disperses and prevents sludge formation, keeping fuel systems cleaner.
2. Stabilizes fuel blends, reducing compatibility problems.
3. have longer working life, less down-time.
4. Fuel acids are neutralized. Fuel system components.
5. Demulsifies water from fuel and improves centrifugal Separation.
6. Reduces corrosion in tanks and fuel lines.
7. Prevents filter blockage and improves injector spray Pattern.
