How to use your medicine Potassium Permanganate KMnO_4 solution

The concentration of KMnO_4 solution sitz bath is usually 1:10000 (i.e. one teaspoon of solution is diluted with water to 2 Liters, or otherwise indicated.)

1. Wear disposable gloves.
2. Based on the area needed to be bathed, measure suitable amount of warm boiled water. (Water volume is best at multiple of 2L). Do not use boiling water in order to avoid scalding.
3. According to the amount of water, add suitable amount of KMnO_4 solution. [e.g. : 5mL 1 teaspoon 2L, 7.5mL 1.5 teaspoon 3L and so on]. The diluted KMnO_4 solution appears as light pink or light purple in colour.
4. Immerse the affected area in the solution for around 5 -10 minutes or until the warm water becomes cool.
5. Dry with clean towel. There is no need to rinse with water again after bathing with KMnO_4 solution
In case of spillage of solution on other skin areas, wash with soap and water immediately. The skin will be stained but normal skin colour will be restored few days later.

Caution Sitz bath tube towel will be stained by KMnO_4 solution. They should not be used for other purposes.
