

**RX MARINE INTERNATIONAL**  
**Total Solution Total Protection**  
**AN ISO CERTIFIED COMPANY**

**Product Name :-** ANTISCALANT 9209 RX

**Part/Order No :** Packing.  
RXSOL-51-6005-025 25 Ltr

**Description:**

RXSOL antiscalant is specially designed to control the development of scale in seawater distillation plants. It is based on a synergistic blend of phosphonates which are found to be more effective than other polymers at controlling carbonate and sulphate scale formation in sea water distillation units .

**Benefit:**

Convenient liquid formulation for automatic dosing using suitable dosing equipment.

- ☒ Prevents formation of hard scale in seawater distillation units.
- ☒ Performance surpasses other similar products.
- ☒ Cost effective concentrate.
- ☒ Effective at high temperatures.

**Dosage:**

The correct dosage rate is dependant upon several parameters, including feed temperature, pH, and chemical analysis and will be specified by your VWS consultant after a detailed survey of your plant. To obtain the best results, RXSOL Antiscalent should be added continuously using a suitable metering pump

**Specification:**

Appearance	Clear, amber liquid
Specific Gravity	1.14 – 1.20
pH	1.0 - 1.5
Flash point	Non-flammable
Solubility in water:	Soluble in all proportions
Dangerous goods	YES

**Safety information:**

Gloves and goggles should be worn as a precaution when handling the concentrated solution. (See Material Safety Data Sheets for further information).
