Total Solution Total Protection

AN ISO CERTIFIED COMPANY

condensor-inhibitor-Antifoulant Conc.

Part/Order no:	Packing
RXSOL-40-4027-25	25 Ltrs
RXSOL-40-4027-210	210 Ltrs

Product Description:

Corrosion inhibitor/antifoulant - cooling water, closed circuit systems

RXSOL-40-4025 is a superior corrosion inhibitor developed for closed water circulating systems. RXSOL-40-4025 is based on a blend of organic and inorganic corrosion inhibitors intended to protect steel, copper and other non-ferrous metals.

RXSOL-40-4025 is an ideal treatment for closed chilled water and low pressure heating systems.

RXSOL-40-4025 is NOT intended for use in systems containing Aluminium. When compared with more traditional nitrite-borate based corrosion inhibitors RXSOL-40-4025 offers the benefit of a lower dosage rate and will raise the system TDS to a much lesser degree.

Dosing of RXSOL-40-4025 should be dosed at 1000 - 2000 ml/m³ in order to give an active reserve of 200ppm of sodium nitrite.

In systems requiring significant passivation higher initial dosages may be required to yield the required nitrite residual.

Enjoy our Warehouse Services

We are engaged in rendering Warehouse Services to the clients, so that they can safely store their goods. Our services are availed by renowned manufacturers, traders and suppliers from different parts of the country. Moreover, our warehouse is free from pests and rodents as we take various pest cleaning measures. Our Warehouse Services are offered to the clients at cost effective rates.

FEATURES :

1. Builtup with International norms
2. Safety with CCTV, Security Guard
3. Full amenities
4. Free from pests and rodents
5. Large space available
6. Available in all major port locations
